

Lifesharing began in 1982 with a family in Berks County who wanted to support a friend in their own home. It is also known as “Family Living” which better describes the lifestyles and choices of the people being supported.

Lifesharing allows individuals with an Intellectual or Developmental disability the opportunity to live with and share life experiences with supportive families in a caring household with personal relationships.

Living with a family enriches the lives of individuals with a wide variety of needs and challenges by offering another residential living option.
